DETAILED ACTION

Election Requirement

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Numerous compositions are claimed. For example, the composition comprises cholesteryl ester transfer protein inhibitor defined by the following structures:

- i. Formula I
- ii. Formula II
- iii. Formula III
- iv. Formula IV
- v. Formula V
- vi. Formula VI
- vii. Formula VII
- viii. Formula VIII
- ix. Formula IX
- x. Formula X
- xi. Formula XI
- xii. Formula XII
- xiii. Formula XIII

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, a composition comprising a solid amorphous dispersion of a cholesteryl ester transfer protein inhibitor and a concentration-enhancing polymer is generic.

Art Unit: 1615

If applicants elect any of groups i-xiii, applicants must further elect a single specific cholesteryl ester transfer protein inhibitor. For example, applicants must elect a single cholesteryl ester transfer protein inhibitor that defines a specific composition by completely defining the cholesteryl ester transfer protein inhibitor of say, Formula 1, whereby the variable parameters such as R_{1-3} , R_{1-4} , R_{1-5} , R_{1-6} , R_{1-7} , R_{1-8} , Y_1 , X_1 , Z_1 , Q_1 , V_1 , T_1 are fully defined for a specific single cholesteryl ester transfer protein inhibitor as in claims 11 and 12. Applicants must further elect a single concentration enhancer for the single elected composition as defined by the single cholesteryl ester transfer protein inhibitor. In addition, applicants must elect a single disease that could be treated with the elected single composition.

In addition, applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 1615

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
